

MBA (Project Management)

University of Wales

One Year Full-time

Qualification

On successful completion of the programme you will be awarded a Master of Business Administration (MBA) (Project Management).

Awarding Body

This scheme is validated and awarded by the University of Wales. For further details regarding the University and its validation services, please visit www.wales.ac.uk/validation.

Course Description

The University of Wales MBA programme is designed to equip you with essential modern management skills and knowledge and prepare you with an enterprising spirit grounded on solid business practices. The programme also aims to provide you with analytical and decision making capabilities in order to face different kinds of new challenges resulting from the rapid changes seen in today's growing business environment. You will study tools and techniques that will help you develop and manage products and services that will be competitive internationally.

The programme will provide you with the opportunity to develop specific expertise in project management.

Mode

Full-time at **ibam** Study Centre

Course Content (Modules)

Comprises an induction and eight modules:

1. Managing Change in Organisations

This module will provide you with an understanding of the nature of organisational change; the role of a manager in dealing with that change; and skills which will allow them to contribute positively to the change process. After completing this module you will be able to:

- Critically evaluate and define the nature of the change process.
- Apply a range of appropriate conceptual tools applicable to the management of change situations.
- Critically review how organisations have responded to change.
- Synthesise and analyse the links between

knowledge management, knowledge tracking and knowledge migration in organisational/change management.

- Design strategies to deal with resistance to change.

2. Financial Management

This module will provide you with the tools to enable you to interpret and evaluate financial information and utilise financial information for decision-making purposes. After completing this module you will be able to:

- Draft financial statements.
- Critically analyse information contained in published financial statements.
- Select and apply financial decision-making techniques to appraise projects.
- Evaluate complex investment decisions.
- Utilise spreadsheets to present and analyse financial information.
- Appreciate differences between financial decision-making in the public and not for profit sectors as compared to the private sector.
- Apply appropriate techniques to protect against currency loss.

3. Marketing Management

You will investigate the role and function of marketing within the context of changing markets and increasing international competition. After completing this module you will be able to:

- Critically evaluate the information needs of the marketing function in terms of its contribution to the strategic processes and tactical decision-making.
- Integrate marketing decision-making with organisational strategy.
- Establish a broad base of marketing knowledge and the strategic implications.
- Develop and implement marketing plans for a product or service.
- Reflect an international perspective and the global context of decision-making in marketing planning.
- Evaluate the appropriateness of e-business strategies.

4. Managing the Human Resource

This module will help you to develop critical awareness of the contribution the human resource can make to workplace effectiveness. It will develop your ability to apply theoretical human resource models and concepts to a wide variety of work situations. This module is also designed to stimulate your thought on how an organisation design can impact on the effectiveness of people. After completing this module you will be able to:

- Critically appraise the contribution people can make to an organisation.
- Analyse how factors concerning the management of human resource vary within an organisation and across situations.
- Compare and contrast the concepts of management and leadership.
- Demonstrate how to lead and develop effective teams.
- Analyse a human resource problem and apply appropriate models to develop solutions.

5. Strategic Management

This module will introduce you to the strategy process in a range of organisational contexts.

After completing this module you will be able to:

- Critically analyse a range of strategic decision-making models.
- Undertake a strategic analysis of an organisation.
- Apply a range of strategic choice frameworks to generate and evaluate an organisation's strategic options.
- Demonstrate the need to reflect cultural, structural and behavioural issues in the strategic process.
- Develop and justify plans for the implementation of agreed strategies.

6. Management of Projects

You will critically evaluate the role of project manager and develop knowledge of areas surrounding project control. After completing this module you will be able to:

- Distinguish between types of projects and the responsibilities of those involved.
- Critically evaluate different approaches to projects, including process models, prototyping.
- Apply principles of leading and managing teams.

- Assess and evaluate project scope.
- Respond to the key legal issues surrounding project management and tendering.

7. Project Management Techniques

This module will provide you with the appropriate skills for project planning and scheduling and enable you to respond to resource requirements within a project. After completing this module you will be able to:

- Reflect on the process of project management.
- Identify and apply appropriate techniques for planning and scheduling in different situations.
- Critically analyse different organisational and project structures.
- Develop strategies for the control of target setting, slippage, benchmarking.
- Select and prepare necessary project documentation.

8. Research Methods

This module will provide you with a conceptual framework from which research philosophies, strategies and methods associated with business management can be critically reviewed. You will develop research competencies, in particular those relating to data collection and analysis, that will enable you to design, undertake and evaluate independent research in an organisational setting. After completing this module you will be able to:

- Critically appraise research undertaken by others.
- Propose and justify a report for a research project in business management that will stand up to critical scrutiny.
- Critically appraise the contribution primary and secondary data sources can make to research studies, particularly with respect to sampling, statistical analysis and data presentation techniques.
- Synthesize research findings to improve the quality of decisions in management.

9. Dissertation

You will be required to undertake a 20,000-word dissertation.

Assessment

You will complete two timed assessments, which you will complete within 24 hours, similar to an examination, four assignments of not less than 4,000 words each and an organisation based piece of coursework. You will also complete a 20,000-word dissertation.

Duration of Programme

Normally one year

Entry Requirements

- An undergraduate degree from an approved university, plus at least two years' professional full-time work experience.
- Applications from mature candidates without an undergraduate degree are welcomed provided they can demonstrate a minimum of five years professional management experience supported by references covering the five year period.
- English ability equivalent to an IELTS score of 6.5, for overseas candidates who have not previously studied in English

Please note that a Postgraduate Diploma or Masters degree alone (without an undergraduate degree or 5 years managerial work experience) will not be sufficient to allow entry to this programme.

What's Included

RDI's Online University **ilearn** is used to deliver all resources for this course including:

- **Free Laptop** - Access electronic copies of your learning materials and important information, such as assessment instructions, whenever and wherever you are.
 - **Tutor support** - On campus based lectures and tutorials to enhance study materials and generate discussion with fellow students
- External resources** - Links to external sources can include key journal articles, your university's online library, sites of topical interest, etc.

Exemptions

For this qualification we may allow you to count credit for relevant study you have already done elsewhere. For example, holders for the BTEC DMS will be eligible for advanced standing. For other equivalent qualifications exemptions are considered on an individual basis when you submit an application form. Please note that we cannot consider work experience alone for exemptions.

How to Apply

In addition to a completed application form:

If you have a recognised undergraduate degree:

- Original or certified copies of your degree certificate and/or transcripts.
- Proof of English language ability (IELTS or TOEFL), if English is not your first language or you have not previously studied in English.
- One suitable reference. Please note we can only accept professional academic or work references.
- Copy of your CV detailing your work history (must demonstrate at last two years professional full-time work experience)

If you are applying on the basis of your management experience:

- Two suitable references (covering a five year period). Please note we can only accept professional work references.
- Copy your CV detailing your work history (covering the last five years).
